

Unser Mandant ist ein weltweit agierendes sehr erfolgreiches Unternehmen in der Pharmazuliefererindustrie, das in seiner Branche eine führende Marktposition einnimmt. Das Unternehmen produziert und vertreibt mit hoher Nachfrage innovative Produkte auf den Gebieten „Pharma Packaging Innovations“ und „Specialty Films Solutions“. Für den weiteren Ausbau des Teams sind wir nunmehr mit der Besetzung der Position „Product Development Manager (m/w/d)“ betraut.

Product Development Manager (m/f/x)

Freiburg i.B. area | Independent Working | Teamwork | Home Office Flexibility

What is the offer/Benefits:

- Attractive remuneration
- Additional vacation pay and annual bonus
- Employer-funded company pension scheme
- Very good development prospects
- Company fitness offers
- Company restaurant

Responsibilities as a Product Development Manager (m/f/x):

- Lead key projects within R&D to support business goals and ensure they are on time and within budget
- Identify and propose opportunities for new projects to improve existing products and study the potential of new products (technology scouting)
- Establish project goals and priorities by collaborating with Product Management Operations, Sales and General Management
- Oversee complex research projects, analyze results and provide recommendations based on findings
- Review and optimize R&D processes to establish standard work processes in accordance with high pharma standards
- Understand customer expectations in respect of expected product modifications/new product innovation
- Scale-up new or improved products in production at our sites in Germany, US and Singapore

- Document all phases of research and development
- Establish and maintain testing procedures for assessing raw materials, in-process and finished products. Manage the R&D lab (internal and external testing) to ensure delivery of on-time, meaningful, reliable results
- Participate in industry conferences on research topics of interest
- Assess opportunities to create Intellectual Property for new developments and present to Management

Skills & Knowledge:

- Degree in Chemistry, Chemical Engineering, Materials Science or related degree required, Ph.D. preferred
- You can demonstrate success in a relevant role and bring with you at least 2 years of professional experience in R&D management and more than 5 years in R&D positions
- You have strong technical knowledge of polymers / plastics – ideally in the area of plastic processing and coatings of thermoplastics. Experience within the Pharma Industry will be a plus
- Strong desire to deliver results
- Independent, systematic, and results-oriented working style, combined with a strong sense of creativity for new product ideas. Great problem-solving skills. Ability to pay attention to details
- The ability to communicate well with customers, colleagues, and lower-level staff
- Well organized, able to effectively manage time and workload
- You speak English and German fluently
